Medical Air Bridge Overview

- Expedites Delivery of High-Priority Shipments
 - Air Link Between CONUS Suppliers & Warfighter
 - Uses Commercial Consolidation Point
 - Relies on Commercial Premium Transportation
 - Currently Serves CENTCOM and EUCOM
 - May Be Expanded to PACOM

- Process Managed Using Web Site
 - Enables DSCP to Enter and Track Order
 - Alerts Consolidation Point of Incoming Orders
 - Enables Consolidation Point to Record Actions
 - Receipt
 - Consolidation into Pallets/Containers
 - Shipment
 - Enables In-Transit Tracking until Delivery

Medical Air Bridge

Welcome to the CENTCOM & EUCOM Medical Air Bridge Web site. The Medical Directorate's Air Bridge expedites the delivery of high-priority medical materiel to our Warfighters overseas. We operate the Bridge in partnership with our customers, commercial suppliers, Prime Vendor and commercial air delivery services. Owens and Minor Inc. operates the CONUS hub of the CENTCOM & EUCOM Medical Air Bridge where our shipments are consolidated for delivery overseas.

This site enables the Directorate and its partners to record, track and communicate transactions as materiel flows from our suppliers through the consolidation hub to the Warfighter. This site consists of five functional areas designed to control and monitor our Air Bridge operation. The following is a short summary of each area.

Submit Order
Enables our government contracting personnel to enter key information about high-priority orders that are delivered to our customers via the Air Bridge and alert Owens & Minor of inbound shipments.

Edit Order
Enables our government contracting personnel to edit or update information about high-priority orders that were previously entered through the Submit Order area.

Search
Enables authorized users to find a specific order using one or more key data elements that identify the order.

Owens & Minor
Enables Owens & Minor personnel to enter information relating to the receipt, consolidation and shipment of orders.

Status/Metrics
Enables authorized users to obtain status of a specific shipment or metrics depicting key indicators of the efficiency and effectiveness of our Air Bridge operation.

Questions, comments or recommendations about this area, or our Medical Web Portal, should be submitted through our Suggestion Box or Customer Assistance Web sites.

Owens & Minor

As the operator of the CENTCOM & EUCOM Medical Air Bridge CONUS hub, Owens and Minor Inc. receives, identifies, consolidates and positions materiel for air shipment to the Warfighter. This Web area provides the functionality for Owens and Minor personnel to monitor incoming shipments and record information related to their cross docking and consolidation activities.

This area supports the four functions summarized below:

Open Items
Enables Owens and Minor personnel to view information on materiel inbound to the hub.

Received Items
Enables Owens and Minor personnel to acknowledge receipt of an inbound shipment, queue the materiel for outbound shipment and enter shipping information.

Shipped Items
Enables authorized users to view shipping information on outbound shipments.

Search
Enables authorized users to find a specific order using one or more key data elements that identify the order.

Questions, comments or recommendations about this area, or our Medical Web Portal, should be submitted through our Suggestion Box or Customer Assistance Web sites.
